HASEEB UR REHMAN

Place of birth: Faisalabad, Pakistan | **Nationality:** Pakistani | **Gender:** Male | **Phone number:**

(+92) 3011073326 (Mobile) | **Email address:** abdullah12151218@gmail.com | **WhatsApp Messenger:** +923156599121 |

Address: Quaid-e-Azam park st#4 manawala, 37100, Faisalabad, Pakistan (Home)

ABOUT ME

Bachelor of Science in Artificial Intelligence (BSAI) student at the University of Agriculture, Faisalabad. Skilled in artificial intelligence, machine learning, and intelligent systems. Completed a deep learning project on image forgery detection using lightweight CNNs. Passionate about building smart solutions, motivated, quick learner, and ready to contribute to innovative tech teams.

WORK EXPERIENCE

BUSSIENSS HUB – FAISALABAD, PAKISTAN

INTERN – 03/2025 – /2025

I'm **Abdullah**, an Artificial Intelligence Engineer with hands-on experience working on real-world AI and web development projects. My work spans **machine learning**, **computer vision**, and **LLM integration**, using tools like **Python**, **TensorFlow**, **PyTorch**, **OpenCV**, **FastAPI**, **MongoDB**, **LangChain**, **LangGraph**, and the **OpenAI SDK**. I focus on building intelligent systems that solve practical problems and reflect modern AI workflows..

EDUCATION AND TRAINING

2022 – 2024 Faisalabad, Pakistan
INTERMEDIATE Worker Welfare School for Boys Faisalabad

2024 – 2028 Faisalabad, Pakistan
BACHELOR OF SCIENCE IN ARTIFICIAL INTELLIGENCE University of Agriculture Faisalabad

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	C2	C2	C2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

TensorFlow | PostgreSQL | LangChain | Python | Doker | OpenCV | OpenAI SDK | LangGraph | FastAPI

PROJECTS

2025

Image Manipulation Detection Using TensorFlow and Lightweight CNNs

Designed and developed an image manipulation detection model using TensorFlow and lightweight CNN architectures, tailored for deployment on edge devices. Focused on real-time detection of forgeries such as splicing and retouching, with minimal resource consumption. Integrated a responsive web interface for interactive testing and visualization.

2025

Intelligent Hospital Management System using AI and Data Analytics

Designed and implemented an AI-driven hospital management system that streamlines patient data handling, appointment scheduling, and resource allocation. Integrated real-time analytics for patient categorization based on symptoms and medical history. Utilized machine learning to assist in disease prediction and optimize doctor assignment. Included an intuitive admin dashboard with visual insights to support informed decision-making in hospital operations.

2024

Intelligent Resume Analysis Using Natural Language Processing

Developed an AI-powered CV Analyzer using Natural Language Processing (NLP) and machine learning to evaluate resumes based on skills, experience, and job relevance. The system parses and scores CVs, highlights missing qualifications, and provides personalized feedback. Designed for use in recruitment workflows, it streamlines candidate screening and ensures objective, data-driven evaluations.
